DETAILED ACTION

Allowable Subject Matter

Claims 1 and 13-20 are allowed.

The following is an examiner's statement of reasons for allowance: As noted by Applicant on pages 8-9 of the remarks,

Claim 1, the prior art of record does not teach nor suggest, in the claimed combination, an improved electromagnetic work coil with *"at least one clamp member located on said stressing region, said clamp member including two clamp surfaces and a part in tension outside of the stressing region to tangentially compress the windings in the stressing region... said conductor windings forming symmetric paths to form symmetrically aligned magnetic poles around said clamped stressing region, said conductor windings being tapered to increase in height and width outside of the stressing region to improve thermal and electrical conductivity and decrease the magnetic field outside of the stressing region"*

Claims 13 and 20, the prior art of record does not teach nor suggest, in the claimed combination, a an improved electromagnetic work coil with *"the work coil divided into regions with a surface adjacent to said conductive work piece, said windings passing through at least one stressing region and at least one return path region, said windings including a first winding turn and a second winding turn, the portion of said windings passing through said return path region being wider in a direction that increases the distance from said first winding turn to said second winding turn than the portion of said windings passing through said stressing region"*.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

Art Unit: 2832

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
